SUMMARY

- Ambitious second-year Computer Science student specializing in Full Stack Development, with hands-on experience in React, Next.js, TypeScript, and Java.
- Proficient in creating scalable web applications and designing RESTful APIs, along with adept management of PostgreSQL and MongoDB databases.
- Self-driven and growth-focused, with a strong ability to quickly learn, adapt, and turn ideas into scalable, real-world solutions.

EDUCATION

Assumption University of Thailand – Thailand, Bangkok

Nov 2024 - Present

Bachelor of Science in Computer Science

GPA: 3.5/4.0

Relevant Coursework:

- Data Structure and Algorithms
- Software Engineering
- Android Application Development
- Object Orient Programming

TECHNICAL SKILLS

Frontend – Next.js, React.js, Tailwind CSS,

Testing – Jest

Backend – Java (Spring Boot)

Databases – PostgreSQL, MongoDB

PROJECTS

GearUp - Vehicle Marketing Platform

Sep 2025 – Feb 2026

Frontend Developer

Tech Stack: Next.js, TypeScript, Tailwind CSS

- Collaborated with a backend developer in an agile-inspired workflow to design and integrate 50+ APIs
- Designed and managed scalable front-end to enable long-term maintenance of 20000+ line of codes
- Implemented Redux to manage efficient state and Used @TanStack/Virtual to handle DOM loads

- Optimized overall web performance, accessibility and SEO, achieving 100/100 Lighthouse scores across all categories.

MASMAX – Cinematic Platform

Mar 2024 – Aug 2024

Full Stack Developer

Frontend: React.js, TypeScript, Tailwind CSS

Backend: Java (Spring Boot), PostgreSQL

- Developed a full stack web application by integrating secure authentication, ticket booking, filtering, content browsing and responsive UI behavior
- Optimized Image-driven application performance, achieving 99/100 Lighthouse scores and improving performance by 24%
- Build backend services with Spring Boot, improving API performance by reducing latency through optimized database queries and request handling
