SUMMARY

Product-focused frontend engineer building scalable, production-grade web platforms with expertise in Next.js, TypeScript, frontend architecture, testing infrastructure, and performance optimization

EXPERIENCE

GearUp - Vehicle Marketing Platform

Sep 2025 – May 2026

Frontend Engineer

- Sole frontend engineer for a three-role vehicle marketplace platform built with **~32K TypeScript LOC**, supporting buyers, dealers, and admins across search, transaction, verification, and real-time messaging workflows
- Architected scalable frontend infrastructure with modular feature architecture, centralized API services, protected role-based routing, DTO mapping layers, and SignalR real-time integration
- Built production-grade quality infrastructure with **300+ automated tests**, CI/CD pipelines, accessibility enforcement, SEO architecture, route-level error isolation across **39 App Router pages** and achieve a Lighthouse score of 100.

MASMAX – Movie Browsing Platform

Mar 2024 – Aug 2024

Full Stack Developer, GitHub: github.com/Matt-2004/MasMax_backend

- Built a full-stack movie discovery platform solo using React 18, TypeScript, and Supabase — shipping 10 routes, dual OAuth auth, and per-user watchlist end-to-end
- Boosted Lighthouse performance by 24% via code splitting, 5 Vite vendor chunks, and responsive image optimization on an image-heavy UI
- Extended the platform with an AI recommendation chatbot, Cloudinary avatar uploads, and 3 persistent themes — turning a browse app into a personalized experience

EDUCATION

Assumption University of Thailand – B.Sc. in Computer Science

Nov 2024 – Present

GPA: 3.5/4.0, Expected graduation - 2028

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, React, Next.js, Node.js, Express.js, Tailwind CSS

Libraries & Tools: TanStack React Query, Axios, Zod, React Hook Form, React Router DOM, Cloudinary, Supabase

Architecture: Modular Feature Architecture, DTO Mapping, Role-Based Routing, Context API, REST API Integration

Testing: Jest, Playwright, jest-axe

Infrastructure: CI/CD, GitHub Actions, Docker, REST APIs, SignalR, Supabase, PostgreSQL, Vercel
