SUMMARY

Full-stack Computer Science student experienced in React, Next.js, TypeScript, Node.js, and Golang. Skilled in building scalable web applications, designing RESTful APIs, and managing PostgreSQL and MongoDB databases. Passionate about clean architecture, performance optimization, and delivering seamless user experiences in agile environments.

EDUCATION

Assumption University of Thailand (2024 – Present)

GPA–3.5

Bachelor of Science in Computer Science

Relevant Coursework: Data Structure and Algorithms, Object-oriented Programming, UI/UX, Software Engineering

PROJECTS

GearUp – Vehicle Marketplace Platform (Frontend Developer)

Sep 2025 – Feb 2026

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Zod, REST API, TanStack Virtual, Jest

- Architected and developed a scalable Next.js + TypeScript application with dynamic routing, reusable component architecture, and integration of 10+ RESTful APIs for vehicle listings, scheduling, and analytics.
- Implemented secure authentication with protected routes and token-based session management while optimizing large dataset rendering using TanStack Virtual to significantly improve performance.
- Enhanced application reliability through comprehensive Jest unit testing and achieved a 100/100 Lighthouse score across Performance, Accessibility, SEO, and Best Practices.

MASMAX – Movie Browsing Platform (Full Stack Developer)

Mar 2024 – Aug 2024

Tech Stack: React, TypeScript, Tailwind CSS, TanStack Virtual, GoLang, PostgreSQL, Firebase

- Built a full-stack movie platform with category filtering and responsive UI, implementing JWT-based authentication and secure watchlist management with persistent database storage.
- Developed RESTful APIs for user-specific features and optimized large dataset rendering using TanStack Virtual to significantly improve performance.
- Enhanced overall application efficiency by refining state management, reducing unnecessary re-renders, and achieving an 84/100 Lighthouse performance score.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Go, SQL

Frontend: React.js, Next.js, Tailwind CSS, TanStack Query, TanStack Virtual, Responsive Design

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, Middleware Architecture

Databases: PostgreSQL, MongoDB

Testing & Performance: Jest, Lighthouse Optimization, Virtualization, Performance Tuning

Tools & DevOps: Git, GitHub, Postman, Docker, CI/CD basics
